

SECTION 4. REPORTING AND CONTACT INFORMATION

A. Reporting Requirements

All HIV/AIDS Patient Care Resources contracted providers and county health departments are required to adhere to reporting requirements as defined by the state and federal governments and any subsequent changes to these requirements enacted during the program year. Providers must establish data collection systems adequate to accurately meet state and federal reporting requirements in a timely manner.

In order to assist contractors and health departments in meeting their reporting requirements, the Florida Department of Health, Bureau of HIV/AIDS, has developed AIMS - AIDS Information Management System. AIMS is a web-based, aggregate level reporting system which allows primary contractors and county health departments to electronically report to the Bureau of HIV/AIDS. Questions or concerns about AIMS reporting should be directed to a member of the Reporting and Information Systems Unit staff. AIMS access and training may also be arranged by contacting a member of the Reporting and Information Systems Unit staff.

The *Reporting Requirements for Programs Funded by the Ryan White HIV/AIDS Treatment Modernization Act, Part B*, revised for 2010-11, is designed to answer all your reporting questions for the 2010-11 Service Year.

B. AIMS Reporting Requirements, HIV/AIDS Patient Care Resources Programs

Ryan White Part B Consortia and Emerging Communities		
Report Name	Due Date	Responsibility
Monthly Expenditure and Reimbursement Report	20 th of each month following the month being reported	Contract Manager and Provider
Monthly Demographic Report	20 th of each month following the month being reported	Provider
